REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Applicant's argument filed 6/1/06 is persuasive as such that the closest prior art Shimada et al (EP 963 846) fail to teach or suggest etching a passage-forming layer to form a space portion of the passage-forming layer after there is imparted etching selectivity to a region that will be a space portion of the passage-forming layer as the context of claim 19.

Shimada et al also fail to disclose imparting etching selectivity by doping boron, as set forth in claims 20-22.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The declaration under 37 CFR 1.132 filed 6/1/06 is sufficient to overcome the rejection of claims 19-21 based upon 35 USC 102(b) and 103(a) as to the point that Shimada et al (EP-963 846) fail to teach imparting etching selectivity to regions that will form the space portion as the context of claims 19 and 21.
